PAST PERFORMANCE

USTRANSCOM | Acquisition Strategy for Transportation Management

Supported USTRANSCOM's Joint Transportation Management System (JTMS) to develop an acquisition strategy to obtain DoD approval for a large-scale, multi-billion-dollar digital transformation including the business, technical, and support strategies to effectively manage program risks and objectives. The effort created the plan to modernize over 150 business systems, providing a roadmap to ensure system compliance with acquisition guidelines.

USTRANSCOM | ERP Communications Plan

Developed a Communications Plan and a suite of communication materials for the JTMS and its facilitation of organizational change throughout the multi-year implementation and management of an ERP. The Communications Plan identified several stakeholders, categorized as tactical or strategic, communication mediums, and upcoming events that may serve as communication opportunities.

Air Force | Digital Engineering Workforce Transformation

In support of Strategic Transformation Services, RevTek supported the development of a more robust workforce planning capability to determine appropriate staffing requirements for the acquisition workforce transitioning to modern and emerging digital engineering practices through data collection, analysis and recommendations.

SERVICES & CAPABILITIES

Acquisition & Procurement Support

Optimize acquisition and procurement processes to enhance efficiency and value with data-driven recommendations:

- Business Case & Market Analysis
- Requirements Gathering
- Strategic Sourcing

Enterprise Digital Transformation & Emerging Technologies

Guide organizations through comprehensive digital transformation initiatives by streamlining and modernizing operations with a focus on workforce optimization and preparedness:

- Analysis of Alternatives
- Artificial Intelligence (AI) & Large Language Models (LLM)
- Business Process Reengineering
- Digital Engineering & Modernization
- Enterprise Architecture & Engineering
- Information Sharing
- Intelligent Automation
- Solution Prototyping

Program & Project Management

Dedicated resources to ensure the successful delivery of your strategic initiatives:

- Performance Management & Metrics
- Strategic Planning, Risk & Governance
- Workforce Optimization
- Capability Planning
- Training

Organizational Strategy & Change Management

Guide organizations through changes with strategic insight and tailored support. Confidently navigate the complexities of organization change and foster a resilient agile workplace.

- Communications & Stakeholder Management
- Messaging, Brand Creation & Management
- Communication Artifacts
- Plans, Templates, Tools, Newsletters
- Conference Materials

Business Operations & Independent Reviews

Comprehensive services designed to streamline performance, maximize efficiency, and optimize costs, ensuring sustainable growth and competitive advantage.

- Audits & Independent Reviews
- Corporate Risk Modeling
- Cost Analysis
- Financial Analysis
 - Financial Management System Transformation
 - Internal Audit Control
 - IT Efficiency & Cost Strategy
- Supply Chain Management & Logistics

Information Security, Data & Privacy

Tailored to meet the evolving needs of modern enterprises. Our expertise spans a wide range of services aimed at fortifying your defenses and ensuring compliance with regulatory requirement:

- Compliance
- Cybersecurity & Privacy Assessments
- Data Management
- Data Protection
- Information & Operational Technology (IT & OT)
- Programs & Resilience
- Table-Top Exercises & Training
